3rd st tunnel
penetrated a small
thickness of upper part of
lower Plio near the west
portal (Sper + Grant p 1056)
But believe fossils came
from part that is middle Plio.
(probably upper part of middle Plio)

1/10 mi east of Euclid +
Oranget^{S.D.}, Miller found M. calif.
ms as of Sper + Grant 1058 in 1932
They believe S.D. is mid Plio, but
say that micropaleon. believe it
younger p. 1058 Sper + Grant
+ notes

195³ Soper & Grant ~~P. 1955~~

Geol. & Paleont. of a portion of I. A.
Calif. Bull GSA 43: 1041-1068

"Specs known from 3rd St Tunnel
strata are not very diag but
are believed by us to be middle
Pleistocene." p 1045

Former paper Grant & Gale 1931
said lower part of up. Pled.
& "younger than S. Diego."

J. P. Smith Climatic Rel. of
Text. & Quat. faunas of Calif
region. Pac. Cal. Acad.
Ser 4 Vol 9 (4): 123-173 (1919)

said 3rd St Tunnel upper part of
lower Pled. & older than San Diego.

[Note: Smith's dating of 3rd St Tunnel
correlates with Holman's data for
Cerro del Mar]

	Levin	Levin	70.26

Kohl loc. with manilla humerus
197 Crannell Junction deposit

① Incomplete humerus of a
cormorant, *Phalacrocorax*
sp.

②
#197 2 humeri of small
duck (teal?) ^{a bit slender}
^{but osseous like}
^{a. creca}

→ ③
#205 Moonstone Beach (Dumfries)
✓ ③ Carpometacarpus (L) Uria? (a little larger than Calif.)
✓ ① Proximal frag of tibiotarsus (R)

of grebe, *Aechmophorus*
occidentalis?

✓ ② Distal end large tibia. *Phalacrocorax*

#590 Little River Creek (may be extension of
#205)

Complete carpometacarpus (L)

✓ ^{LC 197} ~~①~~ *Synthlibosomphus* (probably
Murrelet *antiquus*)

✓ ① Prox end femur (L)
Chendytes?

68-3 ^{one deposit} not bird Tombkw. Hill Site Plover, ^{1 possibly} ^{wood-bird}
68-2 not bird Elk Head - Calley Con Site (no age data)

KB1 - not bird wood cat sect, Centerville Beach. Pico
pin
